Course Name : Report Writing Skills

## Assignment

Submitted By : Asad Khan

Submitted To : Mam Marium Azam

Registration No : SP23-BBA-004

Date of Submission : 29<sup>th</sup> Sep , 2023

1-Answer .....	4
1.1-Prologue to the Subject:.....	4
1.2-Issue Explanation:.....	4
1.3-Reasons for the Issue: .....	4
1.4-Outcomes of the Issue:.....	4
1.5-Worldwide Importance: .....	4
1.6-Report's Motivation:.....	5
1.7-Design of the Report:.....	5
1.8-Source of inspiration: .....	5

**Read the sample given below carefully. Identify the section of the report from which the text has been taken for the understanding of a report's structure. Justify your answer by stating the structural features that you have found within this sample.**

**Sample:**

Climate change stands as one of the most pressing global challenges of our time. As our planet's average temperature continues to rise due to human activities, the delicate balance of is undergoing rapid transformation. This rise in temperature is primarily driven by the increased emissions of greenhouse gases, such as carbon dioxide and methane, resulting from activities like the burning of fossil fuels, deforestation, and industrial processes. These greenhouse gases trap heat in the Earth's atmosphere, leading to a cascading series of consequences for our environment. In this report, we embark on a critical exploration of the profound impacts of climate change on the world's biodiversity, shedding light on the urgency of addressing this complex issue and the paramount importance of conservation efforts. The consequences are far-reaching; we witness disruptions in seasonal patterns, shifts in climate zones, and the loss of critical habitats for numerous species. Some creatures, already living on the edge, now face an increased risk of extinction as their habitats vanish or become inhospitable. Additionally, the changing climate affects food chains and ecosystems, which in turn have ripple effects on agriculture, economies, and human livelihoods worldwide. Amidst these challenges, this report endeavors to provide not only a comprehensive understanding of the problem but also a pathway forward. We will delve into the intricate web of interactions between climate change and biodiversity, examining the latest scientific findings, case studies, and conservation strategies that offer hope for mitigating these impacts. By understanding the gravity of this issue and the solutions at our disposal, we can collectively take action to protect our planet's invaluable biodiversity and secure a sustainable future for generations to come.

## 1-Answer

The example gives off an impression of being the **Introductory section of a report**. It fills in as the launch of the report and gives an outline of the report's construction and content. Here are the primary highlights found inside this example:

**1.1-Prologue to the Subject:** The example starts with an overall prologue to the subject, which is environmental change. It features environmental change as quite possibly of the most squeezing worldwide test and momentarily specifies its causes.

**1.2-Issue Explanation:** The example obviously expresses the issue connected with environmental change, which is the increasing typical temperature because of human exercises and its effect on biological systems.

**1.3-Reasons for the Issue:** The example distinguishes and makes sense of the essential drivers of environmental change, explicitly the expanded discharges of ozone depleting substances coming about because of exercises like copying non-renewable energy sources, deforestation, and modern cycles.

**1.4-Outcomes of the Issue:** It frames the outcomes of environmental change on the climate, remembering disturbances for occasional examples, changes in environment zones, and the deficiency of basic living spaces for species. It additionally specifies the expanded gamble of termination for certain species.

**1.5-Worldwide Importance:** The example underlines the worldwide meaning of the issue, as environmental change influences biological systems as well as agribusiness, economies, and human jobs around the world.

**1.6-Report's Motivation:** The example obviously expresses the reason for the report, which is to investigate the effects of environmental change on biodiversity and stress the significance of preservation endeavors.

**1.7-Design of the Report:** It gives an outline of the report's design, demonstrating that the report will dive into the collaborations between environmental change and biodiversity, inspect logical discoveries, present contextual investigations, and examine protection techniques.

**1.8-Source of inspiration:** The example closes by persuading the peruser to make a move on the whole to safeguard biodiversity and secure a supportable future.
